COMMERCIAL AND FINANCIAL

After a Weak Start Wheat Closed Quite Strong.

TRADING IN CORN WAS OF FAIR VOLUME

There Was Less Than the Usual Interest in the Oats Market-Provision Took a New Turn.

CHICAGO, Aug. 4.-After a weak start, caused by the Diamond Match failure, wheat closed firm on good demand for shipments at 58%c for September against yesterday's close of 58%c. Corn closed Mc higher and provisions closed firm and

There was a moderate trade in wheat, in wheat. The feeling at the start was rather uncertain, owing to the easier feeling in Wall street, and then the large local failure on the Stock exchange was a factor, but the market, all things considered, held up fairly well. Initial trades were at from le to like loss, but railled le, cased off a little and closed with ise decline. The weather was most faverable, being hot and clear in the winter wheat sections, which is just what is wanted to dry out the grain and put it in condition for the thresher. Cables were up id, and there was a decrease on ocean passage, Prospects favored very moderate world's shipments, and also added something to the price. The poor grading of today's arrivals was noticeable; out of 240 cars new, eighty three were No. 3 red, lifty-six No. 4 red and fifty-four no grade, but with good weather the quality will undoubtedly improve. Northwestern receipts are increasing again. Contract stocks here decreased last week.

Trading in corn was of fair volume, with increased interest from the outside, fluctuations covering from ise to be range. The market opened weak with wheat and other speculative commodities, owing to the complications in Diamond Match and New York Biscuit, but soon railled, selling up le, and final figures showed from ite to be gain. Early offerings were quite readily absorbed.

There was less than the usual interest in the outs market, and prices moved within a kee range and closed at about the top, at unchanged prices. Trading was chiefly in September and May. A few traders had information that a private crop report to be issued tomorrow will show a reduction.

The result of this patient, but and there were not involved and clicage of the firm. The semisation chancies of the failure and the unusual that had been promoted by the firm. The selling the failure and the unusual that had been precious to the furnities of the failure and the unusual that had been precious to the firm. The selling trade that the New York interests and that also wholesale liquidation in the grangers and others of the price of the firm. The selling the showle the firm the new form unfared by expectations of the fa factor, but the market, all things con-

There was less than the usual interest in the oats market, and prices moved within a ke range and closed at about the top, at unchanged prices. Trading was chiefly in September and May. A few traders had information that a private crop report to be issued tomorrow will show a reduction in the condition of 20 points since last month. There was some buying on today and it helped to strengthen the market.

While traders in grain markets were trying to persuade themselves that the Moore failure on the Stock exchange should make their grain cheaper, the provision men were driven to other considerations and acted as if Diamond Match had never been heard of in the pork pit. The matter that most concerned the pork men appeared to be whether or not there was a Canadian syndicate in control of the special deal, New York appeared to believe there was more truth than good news in it, for the shorts and the latter were evidently impressed with an idea of danger ahead, for they bought September pork.

Estimated receipts tomorrow: Wheat, 125 cars; corn, \$25 cars; oats, 220 cars, hogs, 17,000 head.

The leading futures ranged as follows:

Wall Street Not Much Shocked by the

the collapse of the Diamond Match company of Chicago and the New York Hiscuit company.

inent capitalists as saying that the trouble would be over with in a comparatively short time. Nevertheless it was learned later that the New York banks had called Joans in order to send money to Chicago.

The result of this action, although the fact that it had been taken did not become public, was the withdrawal of offers of short funds for the marking up of rates to 6 per cent for all periods. Call money was advanced to 3½ per cent, as the maximum figure, with the bulk of the transactions, however, at 2½ to 3 per cent, A stiffening in commercial paper rates also took place, lower quotations than 6½ per cent for prime paper being the exception. The market became extremely dull at the recovery, owing to the continued depressing effect of the railroad rate disturbances, disappointing traffic returns and expectations of poor exhibits yet to be published. As the day progressed fractional variations either way occurred frequently, as a result of trading operations. A further rise in actual and posted rates of sterling exchange falled to create a ripple. The railies had extended to 2% per cent in Burlington. Around 1 o'clock the advance was checked and under light offerings by the bears, together with realizing sales, prices rented to near the initial low figures. St. Paul exceptionally declined 6% per cent and Cleveland, Lorraine & Wheeling preferred dropped 3 per cent to 33. Around declined 6% per cent and Cleveland, Lorraine & Canton list, trust receipts, dropped 1 per cent. Virginia Midland stamped 7s and Western Pacific Ists 3 per cent, and Burlington sinking fund 5s 2½ per cent, in the leading shares. The railway bond market was dull, with a sagging tendency. The sales were \$478,000. Cleveland & Canton list, trust receipts, dropped 1 per cent. Government bends were dull but lower on sales of \$10,000.

The Evening Poot says: This morning's sensational advices from Chicago were the guiding forces on today's local market for securities. Necessarily this news was a shock to prices, possibly, however, less of a sh the emptiness of the speculation was exposed last spring. Even now, however, it should be taken at its proper value. Prices dropped on the average something like a point when the market opened. This was not a result of London liquidation; the foreign sales were moderate and early foreign prices close to a New York parity. Local speculators, however, evidently figured for an overwhelming break, and sextlown the market rapidly even after the weak opening. After the first half hour a number of active shares were quoted at least two points under yesterday's closing level. On this decline a sharp recovery ensued, proving two things, first the very large outstanding short account, and second, the full supply of available capital ready for use in emergency. In the meantime the inference drawn in the first shock of surprise that New York institutions and the New York money market would be hurt by the Chicago episode proved quite unfounded. The New York bankers have not so far departed from their senses this year as to loan on skyrocket speculations such as Diamond Match. The Evening Post's London financial cablegram says: The stock markets were quiet today after the holidays. The tone at the opening was rather good until the sharp selling in New York caused a break in Americans here, notably in St. Faul; the fall was so severe that other markets have sympathized. The closing was dull. Americans finally closed above the lowest. The Chicago failure assisted the decline, although the details and extent of the failure are not comprehended here. The Paris and Berlin markets were dull.

CATTLE-There was a good run of cattle again today, though the receipts fell short of yesterday's record by 800 head. kind of cattle here, however, was not such is a good many buyers would like to see the most of them being western feed

There were a couple of bunches of pretty lecent corn-fed steers in the yards, even loads, good enough to bring \$4.00, or above but they were sold on private terms. There was also a load that brought \$3 90, and another \$3.65. A load of very heavy cattle sold at \$4.10. There were a few westerns good enough for the packers, but not many. The market on fat cattle was about steady, the demand being fair, at the same time that the receipts were light. Most everything in the way of beef cattle sold

stuff in the yards, and the market was about steady at the decline yesterday. The supply of feeders was large, there was an active definand and the offer-ings changed hands rapidly. The west-erns sold largely at \$2,2003.30, and a few of them as high as \$3.50. The prices paid showed a little better market on all grades. Representative sales:

| The market continues just about steady with the demand good. Representative sales: No. | Av. 1 tr. 200 culls. | 75 \$1 76 408 Colorado mixed. | 86 2 50 CHICAGO LIVE STOCK.

There is a Fair Stocker and Feeder Trade.
CHICAGO, Aug. 4.—Native beef steers are nov selling on the basis of from \$3.25 to \$3.50 for common dressed beef stock up to from \$4.25 to \$4.55 for choice to the best shipping and export cattle, with the bulk of the sales at from \$ 10 \$4.35. There is a fair stocker and feeds to \$4.35. There is a fair stocker and feeder trade at from \$2.65 to \$3.05, the demand being mostly for stockers. A few fainty heifers sell now and then at from \$3.50 to \$4, but it takes very superior heifers to bring \$3.75, and nost of the cows sell at a low range of prices. Italis sell about as usual, and there was a good calf trade today at from \$2.55 to \$5.60, it being 'calf day.' Texans were unchanged and western rangers sold mostly at low prices, being thin in flesh. Very few cattle from Montana, Wyoming and Dakota sell as high as \$3.00.

Heavy hogs sold at from \$2.75 to \$3.25; mixed at from \$3.10 to \$3.70, and light reights at from \$3.20 to \$4.55, Heavy bold largely at from \$3 to \$3.20; medium at from \$3.15 to \$3.25; mixed at from \$3.25 to \$3.25

to \$1.20. Sheep are salable at from \$1.50 to \$1.75 for inferior, up to from \$2 to \$3.25 for good to choice flocks, sales being largely at from \$2.90 to \$3.15 for natives, and at from \$2.50 to \$3 for western range sleep, which predominate at the present time. Lambs sell all the way from \$2.50 for choice lots. The difference in price between sleep and lambs continues unusually great.

Receipts: Cattle, 2.000 head; hogs, 7,000 head; sheep, 13,000 head.

A number of sheriffs from Iowa and eastern Nebraska were in the city yesterday, enroute to Denver, where they will attend the annual meeting of the Interstate Sheriffs' asannual meeting of the Interstate Sheriffs association. Omaha was made the rendezvous
of all the officials in this section, and they
will go from here. A number of the visitors
were at the county jail yesterday morning
making an inspection of that institution
under the guidance of Sheriff McDonaid. The
latter had intended to go to Denver to attend the meeting, but was prevented from
doing so by the Hoover case.

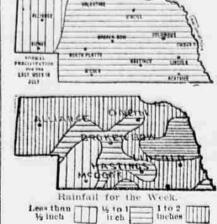

WEATHER CROP BULLETINS

Week in Nebraska a Most Favorable One for Growing Corn.

GOOD CROP IS NOW A CERTAINTY

Rainfall for the Week Was Heavy and General, and the Conditions Were Never Better Than at Present.

Weekly crop bulletin No. 18 of the Ne braska section of the United States climate and crop service, issued from the central office of the section, University of Nebraska, Lincoln, under direction of G. A. Loyeland, for the week ending Monday August 3, 1896, says;

The temperature of the past week ha been about normal excepting on the last day, when it was several degrees above

day, when it was several degrees above, making the weekly average about one degree above the normal.

The rainfall has been generally heavy, falling in showers accompanied by high winds, and in a number of small areas by destructive hall storms. The rainfall to the extreme southwestern counties was between a quarter and a half an inch, while more than an inch fell over the rest of the state and in the lower Platte river valley the rainfall was from two to four and a half inches.

The showery week has been unfavorable for stacking and threshing small grain and some light damage is reported from growing in the shock or heating in the stack. The past week has been very favorable for corn and it has made a rapid growth and the crop is now in an unusually promising condition and is well advanced for the season of the year.

In portions of the southwestern countles corn has suffered severely from lack of rain and the crop is permanently injured. Generally, however, the early planted corn is now considered sure of a good crop and there is a feeling among the reporters of the service that a good corn crop is sure and an excellent prospect for the largest crop ever raised in the state.

Pastures continue in good condition. The wild hay crop is being cut and is a large one. Millet is an unusually good crop.

Reports by countles:

Reports by countles: SOUTHEASTERN SECTION.

SOUTHEASTERN SECTION,
Butler—The rains of the week insure a good crop of corn as far as moisture is concerned, retarded threshing and stacking, and put the ground in good condition for fall plowing. Clouds of grasshoopers flew over on the 26th,
Cass—Corn has made excellent progress. Some damage to shocked grain by rain and threshing delayed.

Clay-Wild hay excellent. Corn growing rapidly and bids fair to be the biggest crop ever produced in the county. There is a large acreage of sorghum, a good crop. Plowing for wheat in progress and ground in good condition. A large acreage will be sown.

Fillmore-The rain early in the week has made early corn. Small grain growing in shock and heating in stack. Hall did considerable damage in the southern part of the county.

Gage-Rain and wind storm of the 28th blew down the corn and cane badly, but they are now straightening up pretty well. But little plowing done yet on account of too wet ground. Threshing is progressing—slowly.

Hamilton-Hall extended over a large area, doing much damage to corn. Small grain, with the exception of oats, a fair crop. Soil in fine condition for plowing.

Jefferson-Tae corn crop is practically assured. condition for plowing.

Jefferson—The corn crop is practically assured, with fair weather from now on. Fruit is plenty and quality good. Fall plowing commenced.

Johnson—Small grain injured in the shock by wet weather. Corn blown down some by high winds on the 28th, but has straightened up much since. The corn crop promises to be a large one. up much since, The corn crop promises to be a large one.
Lancaster—Another fine week for corn. Early planted almost past danger. Some fall plowing done. Millet is a first-class crop. Apples not so many as expected, but plenty.

Nemaha—The storm of the 28th blew down cane and corn stalks, and blew off many apples. All grain in shock is damaged and all stacks more or less wet.

Nuckolis—During the storm of the 28th corn and cane were badly blown down. All threshing machines are running at their full capacity.

Otoe—The week has been hot, with frequent showers. Corn growing rapidly; ears forming

otte—The week has been hot, with frequent showers. Corn growing rapidly; ears forming two and three on each stalk. Rains have retarded stacking and threshing. Bulk of grain in shock still and some danger of spoiling. Pawnee—Corn damaged by heavy storm of the 29th by being blown down and many stalks broken quite off. Small number of grasshoppers passed northeast on the 31st.

Polk—The rain of the 30th and 31st will make the corn crop. Ground in good condition for fall plowing. Pastures freshening up.

Richardson—Favorable weather for the splendid corn crop now growing. Early planted corn in roasting ears.

Saline—Another good week for corn, but hard for stacking or threshing grain. Pastures in good condition; also ground for fall plowing. Cern growing very tall, but shooting well and seems sure of a large crop.

Saunders—Corn in unusually promising condition and all crops doing well, except for an area of about ten square miles, including all of the city of Ashland, which was visited by a most disastrous hall storm on the afternoon of July 31.

Seward—Corn progressing finely and the indi-

Seward-Corn progressing linely and the indi-cations are for an excellent crop. Some are plowing for fall wheat and rye. Apples are falling badly.

Thayer-Ccrn still in good shape, but in south-ern part of the county needs more rain. Early planted is safe. Stacking mostly done and fall plowing begun.

York-Smail grain about all stacked and threshing well under way. The rain of the 36th

Accumulation of Grain Stock.

NEW YORK. Aug. 4.—Special cable and telegraphic dispatches to Bradstreet's covering principal points of accumulation indicate the following changes in available supplies of wheat last Saturday, as compared with the preceding Saturday: Available supply—Wheat, United States and Canada, east of the Rockies, decrease, 2.20.000 bu.; affort for and in Europe, decrease, 2.20.000 bu.; affort for and in Europe, decrease, 2.20.000 bu. Total decrease world's visible, 3.17.000 bu. Corn, United States and Canada, east of the Rockies, decrease, 2.57.000 bu. The more important decreases in available stocks of wheat last week, not covered in the official visible supply statement, bricking in 575.000 bu. In northwestern interior elevators, 197.000 bu. at Nashville and 62.000 bu. at points of accumulation on the Pacific coast remain practically unchanged on August 1, as compared with July 1 this year, having decreased only 10.000 bu.

Kansas City Markets.

KANSAS CITY, Aug. 4.—WHEAT—Slow and lower; No. 2 hard, 534-c; No. 3, 5095514-c; No. 2 white, 215-6215-c. OATS—irregular, but closed firm, No. 2 mixed, 294-c; cades No. 2 white, 215-6215-c. RYE—No. 2 nominally 20c.

HAY—Steady; unchanged, 125-6216-c. RYE—No. 2 moninally 20c.

HAY—Steady; unchanged, 125-6216-c. RYE—No. 2 moninally 20c.

HUTTER—Steady; creamery, 125-6216; dairy. 106612-c. 10 c. 10 ward.
Douglas—Potatoes will average very good.
Wind on the night of the 38t; blew fruit off
trees and blew down corn some, but not much
damage done. Corn in fine condition generally.
Holt—Grain mostly cut, but little in stack
because of wet weather. Millet about all cut.
Plax and buckwheat looking finely. Second
crop of alfalfa in bloom. Corn is extra fine.
Some rev sowed. crop of alfalfa in bloom. Corn is extra flac. Some rice sowed.

Madison—Corn continues to promise an unsurpassed crop. Stacking well under way. Second crop of alfalfa cut.

Pierce—The rains of the past week have assured a corn crop. Harvest is nearly over. Itali in the northern part of the county on the 25th did considerable damage to corn and standing grain. Wild hay being cut and a full crop.

Platte—Rains very damaging to lay and grains in shock, but with seasonable fall insuces the largest corn crop this country has ever produced. Ground in fine condition for fall plowing. duced. Ground in fine conditions.

Sarpy-Corn growing rapidly and looking better than for some time, and prospects for a heavy crop. Small grain is in rather bad condition, as most of it is in the shock still, because of the wet weather.

Stanton-Harvesting is all done and some grain threshed. The quantity is good, but the yield is not what was expected. Corn is growing very fast and is secure.

CENTRAL SECTION.

Boone—Hay crop fine: pastures good. Some apple trees loaded with fruit. Fine rains of the week insure the biggest crop of corn ever raised in this county.

Buffalo—Threshing to progress, but interrupted somewhat by rain. Rye is a seed crop; also potatoes. Corn is in unusually good condition.

Custer—Threshing commenced and small grain yielding better than was expected. Corn much

mproved since the rain, and now in good condition.

Dawson—A showery week for threshing out of shock. Corn generally look finely, but there is a strip four or five miles wide in part of the county that will be almost a failure.

Hall—Wheat is more than an average crop. Corn is the best for this time of the year that this county ever had.

Howard—Small grain all cut and stacking in progress but semewhat delayed by rains. The rain came just at the right time, as it was geiting dry. Corn never booked better at this season.

estaing dry. Corn never looked better at this season.
Loup—Corn looks fairly will. Harvest about over and stacking and threshing commenced.
Merrick—The rain of the with will help corn much. Outs light in amount and weight, Grass, millet and altaffa doing well.
Sherman—Threshing is general. Late rains have improved the corn, and it seems that the crop is now assured. Most oats light and poor; wheat, good yield and mostly good quality. The rain ansures a good corn crop) it is now in the milk. the milk SOUTHWESTERN SECTION.

Chase-Week but and dry, with only to all showers covering small areas. Corn drying up, also grass, potatoes and gardens, small yield. also grass, potatoes and gardens.

Dunly—Thrashing commenced; small yield.
Corn needs rain; some fields burnt up. Late
corn, still holding its own.

Furnas—Some fields of corn in the south part
of the county damaged by drouth. The rain of
the 28th extended over the county and helped the
crop much. The crop will be very streaked,
some fields good and some poor.

Harian—Corn in some fields badly burnt and
some corn injured by being blown down in the
storm of the 28th. Generally, however, the condition of corn is excellent.

Kearner—Too wet for stacking or threshing
grain. Potatoes rotting some. Full crop of
hay from both wild and tame grasses. Irresent
indications are for the largest yield of corn ever
raised in this county.

Phelps—Corn in good condition and the rains
of the week will probably insure a crop. WESTERN SECTION.

WESTERN SECTION.

Cheyenne and Deuel-Hay harvest under full headway, with prospects for a big crop. There will be a large crop of potatoes. Corn is good and pastures excellent.

Ketth-Splendid showers have insured a boundiful corn crop, unless we have unusually dry, hot weather from now on.

Lincoln-Local showers very beneficial to corn and lata potatoes. In some places corn badly damaged by drouth. Pasture and upland hay excellent.

Locan-Harvesting much delayed by wet Logan—Harvesting much delayed by wet weather, but now nearly finished. Prospects

NORTHWESTERN SECTION.

NORTHWESTERN SECTION.

Box Butte—A good week, with heavy rains, Crops are doing thicly again. Small grain being harvested for hay.

Cherry—Grain about all harvested and a good yield. Corn doing well pontoes a fine crop.

Keya Paha—Wheat about all cut and some being stacked; a light crop. Corn looking well, Grass in good condition.

Rock—Still fine growing weather; pastures good and corn splendid. Hay crop light.

Sheridan—Harvest is well under way. Yield is good in some localities and very poor in others. Corn is at least two weeks earlier than usual and is in good condition. Rain has spoilt much hay and retarded the work.

Condition of the Cotton Crop.

MEMPHIS, Aug. 4.—The regular monthly cotton crop report for the Memphis district, to be published tomorrow by Hill. Fontaine & Co., will say in part: The weather during July was in the main unfavorable. Toward the close of the month the temperature became abnormally high and a hented spell set in, the duration of which was never before experienced in this section. This caused wholesale shedding of squares, and young boils and in hearly every section of the district the plant is reported suffering from blight and rust. The damage by states is no follows: Arkansas, 20% per cent; Misslasippi, 22% per cent; Alabama, 10% per cent; Tennessee, 11% per cent. If the present spell of weather continues for ten days longer the damage will be in the nature of a great disaster. Many fields are now white with cotton, the heat having prematurely forced the boils, and picking will begin by August 15, and become general ten days later, which is a month earlier than last year. The corn crop has suffered greatly from drouth and the yield will not exceed half an average crop. Condition of the Cotton Crop.

Good Report from Kansas.

TOPEKA, Aug. 4.—The Kansas weekly cropbulletin issued today says: The temperature into averaged four degrees above normal. The hot, dry week has been excellent for haying, threshing and maturing corn, but in places the heat prevented much work. Corn is generally in very good condition. In the middle division early corn is maturing rapidly, leaving the late corn, which is in fine condition, still subject to weather conditions. The second crop of alfalfa is being cut in Chautauqua county, and the third in Riley. Flax shows a fair yield. Pastures are line, and eattle in good condition.

COLUMBIA, Mo., Aug. 4.—The Missouri crop bulletin issued today says: The past week has been the warmest of the season. The rain in

Unfavorable Weather in Iowa. DES MOINES, Aug. 4.—The weekly weather crop bulletin issued today rays: The weather conditions have been very unfavorable for completing the work of stacking and threshing from the shocks. As a result of the frequent and heavy rains of the past two weeks the unsecured grain has been materially injured by rotting and sprouting. Oats suffered the greater damage, but spring wheat has also been buffly damaged. Grain is considerably injured by excessive downpours and heavy winds. Corn is doing notably well, except in some localities, where it was broken down by wind and hall storms on the night of the 26th.
